

AUTHORIZATION

I, DR. Jannatul Noor assure that I have performed all works furnished here in this report. The Information's have been collected from books, national and international journals, websites and other references. All references have been acknowledged duly.

I hereby declare that I am the sole author of the thesis. I also authorize the Chittagong Veterinary and Animal Sciences University (CVASU) to lend this thesis to other institutions or individuals for the purpose of scholarly research. I further authorize the CVASU to reproduce the thesis by photocopying or by other means, in total or in part, at the request of other institutions or individuals for the purpose of scholarly research.

Therefore, I hold entire responsibility for collection, compilation, preservation and publication of all data accumulated here in this report. I, the undersigned, and author of this work, declare that the **electronic copy** of this thesis provided to the CVASU Library, is an accurate copy of the print thesis submitted, within the limits of the technology available.

The Author

June, 2018

Acknowledgements

I would like to express my deepest wisdom to “The Almighty Allah”, who enables me to complete the research work and dissertation successfully for the degree of Master of Science (MS) in Animal Breeding and Genetics.

I would like to express the first and foremost heartiest appreciation, deepest sense of gratitude and best regards to my supervisor Dr. Md. Kabirul Islam Khan, Professor, Department of Genetics and Animal Breeding, Chittagong Veterinary and Animal Sciences University (CVASU), for his sympathetic supervision, inspiration, constructive criticism, valuable suggestion and providing important information through the course work and research. I feel pleased to thank him for his valuable advice and cooperation. Without his knowledge, perceptiveness, cracking-of-the-whip and encouragement I would never have finished.

I also gratefully acknowledge the supervision of Dr. Ashutosh Das, Associate Professor for his kind cooperation to conduct some molecular analysis and for his encouragement towards preparation of manuscript.

My heartfelt thanks to, Prof Dr. Gous Miah Head, Department of Genetics and Animal Breeding, DR. Md. Moksedul Momin, Assistant Professor and other faculty members of Department of Genetics and Animal Breeding (CVASU) for their constant guidance and encouragement at every stage of this study from its inception to completion. I also thankful to Prof. DR. Omar Faruk Miazi, Department of Genetics and Animal Breeding (CVASU). Also thanks to DR. Inkeyas Uddin, Scientific Officer, Poultry Research and Training Center (PRTC), all of the employee of PRTC and the lab assistants of the Department of Genetics and Animal Breeding for their kind co-operations.

I also gratefully to the by Bangladesh-Swedish collaboration project, entitle “sex selection and adaptation during avian domestication in Bangladesh (ref 2015-05919)”. Bangladesh counterpart Prof. Dr. Md. Kabirul Islam Khan, for partially finances for the research project.

*This research work is also partially financed by CASR, CVASU. I would like to express my deep sense of gratitude and thanks to honorable Vice Chancellor, **Professor Dr. Goutam Buddha Das**, Chittagong Veterinary and Animal Sciences University.*

I thankfully remember all those who directly or indirectly helped me and contributed to finalize the work especially all the chicken owners without whose support this research would not have been successful.

I praise and thank my beloved parents for their understanding, endless patience and encouragement when it was most required and also me very much thankful to my beloved brother and sisters for their constant inspiration and blessings throughout the entire period of academic life. Finally I very much thankful and grateful to my beloved husband DR. Mir Md. Afzal Hossain for his inspiration.

DR. Jannatul Noor

List of contents

Authorization	i
Acknowledgements	ii
List of Contents	iv
List of Tables	vi
List of Figures	vi
List of Abbreviations	vii
Abstract	ix
Chapter-1: Introduction	1-2
Chapter-2: Review of literature	3-14
2.1 History and domestication of chicken	3
2.2 Breeds, types and variation of indigenous chicken	4-6
2.3 Chicken production in Bangladesh	7-9
2.4 Characterization of chicken genetic resources	9-10
2.5 Relationship of plumage color and different gene	10
2.6 DNA extraction method of chicken	11
2.7 Molecular marker	12
2.8 Genetic diversity	12-13
Chapter-3: Materials and methods	14-21
3.1 Study area	14
3.2 Study period	14
3.3 Baseline survey and typing of the chicken	15
3.4 Tagging and recording of the chicken's character	15
3.5 Recorded of different external and internal characteristics of egg	15
3.5.1 External characteristics of egg	15-16
3.5.2 Internal characteristics of egg	16-17
3.6 Blood sample collection for molecular study	17
3.7 DNA extraction	17
3.8 <i>PMEL17</i> gene	18
3.9 Primer selection	18
3.10 PCR and agar gel electrophoresis	19
3.11 Gene sequencing and alignment	19
3.11.1. PCR product purification	19
3.11.2. Sequencing	20
3.11.3. Analytical method and DNA information from gene banks	20
3.11.4. Phylogeny and determination of evolutionary direction	20

3.11.5 Mutation in the plumage color gene	21
3.12 Statistical analysis	21
Chapter-4: Results	22-34
4.1. Phenotypic characteristics of indigenous chicken	22-23
4.2 External and internal characteristic of chicken egg	24-28
4.2.1 External characteristics of chicken egg	24-25
4.2.2 Internal characteristics of chicken egg	26-28
4.3 Molecular study of <i>PMEL17</i> gene	29
4.4 Nucleotide sequencing	30-37
4.4.1 Comparisons of Nucleotide sequence of <i>PMEL17</i>	30
4.4.2 Evolutionary relationship taxa of <i>PMEL17</i> gene	35
4.4.3 Mutation of plumage color (<i>PMEL17</i>) gene	35-36
4.4.4 Maximum composite likelihood estimate of the pattern of nucleotide substitution of <i>PMEL17</i>	37
Chapter-5: Discussion	38-44
5.1 Phenotypic characteristics of chicken	38
5.1.1 Egg production	38
5.1.2 Clutch size	38
5.1.3 Live weight	39
5.1.4 Plumage length	39
5.2 External characteristics of chicken egg	39-41
5.3 Internal characteristics of chicken egg	41-42
5.4 Gene sequencing	42
5.4.1 Nucleotide sequence comparisons of <i>PMEL17</i>	42
5.4.2 Phylogenetic tree analysis of <i>PMEL17</i> gene	42
5.4.3 Mutation of <i>PMEL17</i> gene	43
5.4.4. Maximum composite likelihood estimate of the pattern of nucleotide substitution of <i>PMEL17</i> gene	44
Conclusions	45
References	46-57
