

**Determination of *Salmonella* in table egg (shell and content)
and associated factors in some selected areas of Bangladesh**

EXAMINATION ROLL : 08/14
INTERN ID : A-07
REGISTRATION NO : 357
SESSION : 2007-2008

*Submitted as the partial fulfillment for the degree of
Doctor of Veterinary Medicine (DVM)*

CHITTAGONG VETERINARY AND ANIMAL SCIENCES UNIVERSITY
KHULSHI, CHITTAGONG-4225

March 2014

Determination of *Salmonella* in table egg (shell and content) and associated factors in some selected areas of Bangladesh

Approved as to style and content

Signature of the author

Sazedra Akter

Examination Roll no: 08/14

Registration No: 357

Intern ID: A 07

Signature of the supervisor

Professor Dr M. A. Matin Prodhan

LIST OF TABLES

Table No	Name of the Table	Page no
Table 1	Result of sample culture on XLD and SS agar for Salmonella isolation and identification.	24
Table 2	Table for calculating true and apparent prevalence of Salmonella spp in egg samples	25
Table 3	Salmonella positive% within different strain	26
Table 4	Associated factor for infection Salmonella spp in farm level	28

LIST OF FIGURES

Fig no	Name of the figure	Page no
Fig 1	Schematic representation of the parts of the egg	10
Fig 2	The physical and antimicrobial defenses of a hen's egg	11
Fig 3	Possible way of contamination in egg and egg shell from production to consuming	17
Fig 4	Map of study area in Noakhali and Chittagong	18
Fig 5	Collection and Packaging of egg in egg tray for marketing in Liza farm	19
Fig 6	Black centered colony in XLD agar suspected to <i>Salmonella</i> spp	
Fig 7	Gram staining of <i>Salmonella</i> spp showing Gram-negative, pink colored, small rod shaped under microscope	
Fig 8	TSI slant before inoculation (left) and red slant with yellow butt with blackening indicating <i>Salmonella</i> spp	
Fig 9		
Fig 10	Presence of <i>Salmonella</i> spp in different studied farm
